Serial No.: 10/617,873

## IN THE SPECIFICATION:

The specification as amended below with replacement paragraphs shows added text with <u>underlining</u> and deleted text with <u>strikethrough</u>.

Please REPLACE the paragraph beginning at page 1, paragraph 2, with the following paragraph:

[0002] The present invention relates to a single layered electrophotographic photoreceptor, more particularly, to a single layered electrophotographic photoreceptor which enables obtaining a better image by suppressing a dark decay, and suppressing eauses a decrease in charged electric potential due to repeated use<sub>7.</sub> The present invention also relates to a single layered electrophotographic photoreceptor and which enables a better image that has an extended electrical lifetime.

Please REPLACE the paragraph beginning at page 12, paragraph 42, with the following paragraph:

[0042] In the electrophotographic photoreceptor according to the first embodiment of the present invention, preferably, the antioxidant of chemical Formula (2) is a compound selected from the group consisting of compounds represented by chemical Formulae (9), (10), (11), and (12).

Formula (9)

Formula (10)

Serial No.: 10/617,873

## Formula (11)

## Formula (12)
